Another Triumph.—For some time past says the Albany Review May 31st. we have been urging the necessity of our firemen wearing a badge of some description at fires, that they may be distinguished from outsiders, when not equipped in their uniforms. We have at last succeeded in bringing such improvement about. The Board of Engineers at their meeting last Thursday evening, unanimously recommended each Fire Company to procure a badge to be worn at fires, to designate and distinguish members of the Department. It is to be hoped that each company will act promptly in procuring and wearing their badges. The badge

Ordered, that a suitable badge, shaped in the miniature form of the front piece of a fireman's cap, or such other style as the company may select, showing the number of the company to which the wearer belongs, be adopted as the badge required by the 20th section of Miscellaneous Proisions of the Fire Law, the same to be worn conspicuously on the breast or hat of firemen when on duty and not otherwise equipped

the Fire department of Boston, states to the common council that after the first day of June next, the "Miles Greenwood" will be ready for service, and recommending that as soon as may be, a suitable house be constructed for its accommodation, together with the hose carriage belonging to it, and the horses attached to it. The Chief engiheer also recommends that Zenas E. Smith, Wm. Lovell, Francis Hall, Thomas A. Howes, Loring, Hallett, Badlans, Masbenerly, Crosby, Woodman, Reed and Dearton, be appointed to take charge and man the machine. CAMBRIDGE MASS. F. D.

PHILADELPHIA.

The Chief Engineer of the Philadelphia Department, submitted his third and fourth quarterly reports to the City Council of that city last week. From it we learn that the number of fires during the two quarters was 115; the estimated loss on which was \$187,775, and the insurance \$77,768. leaving an uninsured loss of \$110,817. The decrease of the number of Fires as compared with the preceding quarters is three; the increase in total loss is \$135,859; the increase in uninsured loss is \$88,979. Since the former report, the following companies havebeen added to the Fire Department; Good Intent, Mechanic, Southwark, Good Will, Weccacoe,, Hibernia, and Assistance Engines; and the South Penn, William Penn, United States, Niagara, Western, Good Will, Ringgold, Washington, and Union Hose Companies. The Department now includes 38 engines, 30 hose, and five hook and ladder companies, possessing 30 hose, and five nook and ladder companies, possessing 39 engines, 60 hose carriages, six trucks, 53,850 feet of hose, and 828 feet of ladders. A house is now being erected for the accommodation of the Steam Fire Engine, "Young America," at the N. E. eorner of Front and Noble streets.

The Chief Engineer again recommends that the police be required to communicate alarms during he night to the firemeu who may request it, A good bell should be put up in each fire district, so pefore recommended. No correct list of members had been received from a large number of fire companies. In regard to the origin of fires, an unusually arge proportion were the work of incendiaries. The other causes are not very lucidly stated in the report. Mr. Beidman submitted an ordinance, providing for care of the steam fire engine "Young America," abolishing the office of Assistant Engineer, and giving the single engineer a salary of \$800 per annum, which was read three times and passed finally, though opposed by Mr Gorman and

A few minutes before, gun was fired, and the small yachts of the aird class spread their sails, and sped away. Another gun sent the boats of the second class after

them, and a third let loose the great yachts of the first class After a beautifully contested race the sloops Julia, Una and Richmond were severally the winners of the prizes in the 1st. 2d. and 3d. class. The prize awarded the winning vessel of each class, consists of a punch bowl, tankard and tureen nade of solid silver and wrought after designs orepared expressly for the New York Yacht Club. The tankard, fashioned in the old Flemish style, is some 20 inches high, and weighs nearly one hun ired ounces. The handles are formed of twisted cables, the cover is an anchor, block and buoy, and the body is ornamented with various beautiful and appropriate designs. The punch bowl and tureen, were also of silver, and each nearly one hundred ounces in weight. They were very elaborately

wrought and beautifully designed. THE CAMELS .- The Camels purchased by the Inited States Government in the Mediterranean. or frontier service, have been landed at Indianola. The Galveston Confederate says—Great demonstrations of delight were shown by them upon reaching terra firma once more after a long voy age. Their antics were such as to fill with terror the horses, mules and cattle in the vicinity, and to ause a general stampede.

FISH BREEDING .- At a late meeting of the Boson Natural History Society, the committee to whom the subject of "encouraging and extending the various New England fisheries" was referred, reported it as their belief and conclusion, that the various species of fish, some of which are nearly extinct, may be propagated artificially with entire success and profit, and that if properly developed the enterprise might prove of great benefit to the

Brakes to Fire Engines.

A Washington correspondent of the Scientific American, of June 14th, says:-Fire engines that are to be used where hills have

o be descended should be furnished with brakes of afficient power to enable a small party of men to make any required descent without danger to themelves or the machine; for it often happens that when a fire alarm is given, only a small part of the company is present at starting. In this way life is often endangered, and a valuable engine may be put hors du combat at the moment when it is most

For the want of such an appendage, one very strong and active young man was lately killed in this city by being run over, and his yoke fellow barely scaped, by the engine striking the curb-stone, an caping completely over him. An alarm of fire had een given late at night, and a few men who first collected were endeavoring to take the engine-a heavy one—down a long hill near the engine house, as they had often done, but its velocity became so REGATTA.—The annual Regatta of the New York | great that their force was insufficient to check it, Yacht Club, came off June 5th, under very favora- and the men at the yoke fell, one of them being

Second class: 23,00 to 3,300 feet of canvass. AN UNMANAGEABLE FIRE DEPARTMENT.-From a as a means of extorting from the city government compliance with their just demands. The Louisville Journal says:-The Mayor calls on all good citizens to hold themselves in readiness, as the fire companies have again declined to do any active ser vice until the Council acceds to their demands We think it is high time for the Council either to comply with the demands or set on foot some other system. This is the second time such a contingeney has occured within the past two months.

We have heard that some of the firemen have taken the ropes from the alarm bells on the engine houses, under the pretence that they were procured by the members. In case of fire no alarm can be given. We trust, for the credit of the firemen,

DISBANDED.—The "Torrent Engine" Co. No. 1. Chelsea, Mass. has been disbanded by the Board of Engineers, for disobeying orders in attending a fire at Charlestown.

PRESENTATION .- A magnificent service of silver plate was presented to Captain James Price, of the 3d Company National Guard, New York, on the 2d of June, by the members of his company.

The New Orleans Bulletin speaks favorably of the new fire system in vouge in that city, which place the extinguishment of fires under contract. It thinks that it would be impossible for such a fire to occur as the memorable one of the 5th of Au gust, 1854—a fire that destroyed property, in the heart of the city, to the amount of nearly a million of dollars, and filled, before its fury had been spent, the whole city with alarm. Whew! two dollars day, and roast beef.

A NEW INVENTION: -Mr. Aaron Robertas, a color ed man, in Philadelphia has invented a valuable aid to the Fire Department. It is constructed on the principle of a telescope, occupying a very small space when closed, but capable of being extended to the heighth of some sixty feet, by means of concealed cogs; above this is a branch pipe, made flexible, and worked in any direction by chains reaching the ground. The machine can be run into a varrow alley, and by attaching hose to a fireplug the water will be forced to the top, and thence directed at the pleasure of the operator. Safety is thus afforded to the firemen, and instant applicay tion may be made to any part of a burning build-

Buffalo, N. Y .- They are having quite a time in Buffalo, over the question as to who shall be Chief of the Fire Department of that city. A few weeks ago an election, by the firemen, was ordered. The election was held, and the firemen made choice of one of their prominent men; he didn't suit the Common Council, however. The result is that they are now agitating the question of having a paid Fire Department, and a stame fire engine, which will not throw bricks or drink rum-but explodes throwing lives away, and drinking up the tax-pay-

New York.—The parade of the New York Fire Department is to take place in that city on the 13th October next. The demonstration will not be the actual strength of the organization, but the ser vices of volunteers are to be employed to fill up the rauks; thus recognizing the greatest evil which can attach itself to any Fire Department. We are surprised that the Board of Fire Commissioners intend to allow it.

A Mr Workman was recently elected assessor of a town in Ohio, and gave a heavy bond; but fearing that he was not fit for the office, and to avoid the mortification of being laughed at, he rose in the morning at four o'clock, and went to the barn and hung himself. desperadoes leagued together for the purpose of impoverishing the people of the State by destroying their houses, homes and property, none can for a moment doubt, who has read the fearful accounts of the desolation which surrounds at this time the once flourishing cities of Placerville, Georgetown and Nevada; and came nigh enshrouding Marysville iu the same ruin, and would probably have succeeded, had it not been for the daring and energy of the splendidly organized Fire Department of that city. From the imperfect accounts received of the origin of the above fires, it appears that the plan has been to saturate the building (generally an unocapied one) to which the torch is to be first applied, and the one on each side of it with camphene, so that even at the first alarm an ungovernable headway is obtained. The attempt made to set fire to the house of Mrs. Waterhouse in Sacramento, on Monday morning, confirms this state ment, as to the camphene; for on examination i was! found, that immediately beneath the kitchen boards, had been placed against the main building in an inclined position, material covered up with a number of newspapers completely saturated with camphene. Through the efforts of some Chinamen, who immediately answered the cries of Mrs. Waterhouse for assistance, her property and pos sibly a large portion of the city would have been destroyed. We have every belief that San Fransco is threatened in the same way, not from any actual knowledge of our own, but from what has already transpired in the interior; and imperfectly supplied, as is the Fire Department here with a sufficiency of good reliable hose, a terrible destruction of life and property would ensue, should a fire gain any extent. Under the circumstances we can only appeal to the firemen individually, and as a body, to keep up nightly watches at their engine and truck houses, so that at the first dread cry they may be prompt to respond and give their assistance; and not to lag, but continue their vigils, until the close of the season of winds. The citizens in consideration of their liberality and kindness to the firemen, deserve this much at their hands. and the only boon, we as a fireman would ask in return would be, to have permission to mete out punishment to the firs incendiary caught in the act.

LAFAYETTE.—We hope that the celebration of the 100th birthday of Lafayette, will take place on the 6th. September. We are anxious to see the Fire Department take some action in the matter and to that end it would be well for the foreman of the Lafavette Hook & Ladder Company to communicate, either in writing or otherwise with themen of the various Companies in the Fire Department and learn their views in regard to the subject. We believe that every Company would co-operate with the Lafayette in making the celebration worthy the name and services of their namesike. P. S. Since the above was written, the following

has been published in the journals of the day. The members of the Press, Societies, Clubs, and organized bodies of whatever nature, are respectfully invited to send one or two Delegates to represent them at a meeting which is intended to take place Saturday next, the 26th inst., at 8 o'clock

preciselya at the Truck House of Lafayette Hook & Ladder Company No. 2 Broadway. The purpose of this meeting is to organize a Committee to arrange the best method of com-memorating the above anniversary, which will fall on the 6th day of September next.

MAJOR A. A. SELOVER .- We welcome back with sincere pleasure, our fellow citizen whose name heads this paragraph. The Major has been absent in the Atlantic States, for several months, on a tour of business and pleasure, and returns to San Francisco, greatly improved in health and prospects The Major's popularity and standing in the commu nity, has been evinced by the warmth of the reception awarded him on his return, by his friends of whom none have a more extended or since circle than Major Selover.

We regret to say that the day of reachivalry and truly courageous men and acts are passing rapidly away, and we are uncharitable enough to beleive that in case of a serious fire which threatened the Committee buildings, but few of those firemen or any one else, would remain behind to look out for the safety of so destructive an article as powder which at any moment might engulph them. We seldom or ever hear now-a-days of a "Curtius" or a modern Ephesian youth; the patriotism of the present day is, "Save yourself and the devil take the hindmost."

In writing this article we wish the gentlemen to whom it is particularly addressed, to distinctly understand that it is not done in a factious opposition to them, for in what ever way we may be influenced respecting them, we shall not connect it with the Fire Department. With us the safety of the firemen is peramount to every other consideration; we would be recreant to our duty and position were it not so. The information required is sought for in good faith, and withot implying for a moment, a threat; we shall certainly advise the firemen, in the event of a fire near the Committee Rooms, or a fire breaking out there, during the raging of a fire in any portion of the city, to leave it to its fate, unless they are well assured whether they stand upon a mine which may explode at any moment and entirely destroy them; for we consider that the life of one single firemen is of more importance than all the scoundrels large and small yet caught or uncaught in the meshes of the net of the Vigilance Commit-

With the funds arising from the enefit, the 12's intend to place their apparalus in thorough order, and furnish their new and beautiful house on Jackson street, on which they have expended themselves, about two thousand dollars. A number of very pepular artists have generously come forward and kindly volunteered their services. Among them we notice the names of Mrs. Julia Dean Hayne, Mrs. Booth, Mrs. Judah, Mrs. Julia Gould Collins and Messrs. Pope and Phelps. Besides the nbove dramatic performers, M'lle Therese and Mons, Schmidt of the ballet troupe have also volunteered and will go through with several of their graceful dances. The performance will commence with the beautiful comedy of the Honey moon, with Mrs. Hayne in the character of Juliana, and conclue with the operatta entitled "no song no supper." On Monday evening the beutiful drama of the "Enchantress" will be produced with new scenery dresses &co. The piece has been for some time in preparation.

THE MISSES GOUGENHEIM .- The charities which these ladies have dispensed within the past two weeks to the various societies seeking their aid, and the benefits they have extended to portions of the Fire Department, are of a character which demands something more than a passing notice. The hearts of the widow and orphan have been made glad, and the high and noble aims of gallant men received new ardor through their liberality. We sincerely hope that the ladies of whom we speak, will not be permitted to leave these shores without some token of appreciation for their good and modest deeds. SAN FRANCISCO

SATURDAY MORNING, July 26, 1856.

THE CITY MILITARY.

The following list embraces the various military companies in this county at present recognized by the State authoities. viz: Company A. Marion Rifles, Capt. Riggs; Company B. San Francisco Blues Capt. Farren; 1st Lancers (mounted), Capt. Hayes and the Continental Guard, Capt. Fenn. These are all uniformed companies, and in respect to numbers posess full ranks. Besides the above companies are the Jackson Guard, Capt. O'Regan and the Union Guard, lately organized and mustered into the service of the State.

Several companies of this Brigade have been deprived of their arms by the Vigilance Committee The Military Act of '55, which levies a tax of fifty cents upon every white male citizen over twentyone years of age, will enable them to defray their ex penses in a measure, and keep up their organization in good shape. At present local affairs have materially interfered with their prosperity and efficiency; yet, we hope the time is not fer distant when the whole military force of the county will be thoroughly reorganized and placed upon a proper war footing.

At any rate the old axiom of "in time of peac prepare for war," should not be forgotten. There is no knowing what this Central America question and ealistment imbroglio may lead to; and if the honor of the country is to be vindicated, why, Uncle Sam will depend upon his citizen soldiery to do it. England has a large fleet, flushed with victory, lying idle in her roadsteads, and if war should be declared probably the first movement they would make would be a dash at California. Our harbor possesses the best natural defenses in the world, and with a little knowledge of the science of military engineering our citizens could build their own earthworks, consttuct hurdles to protect them from the shells of an anemy, man the guns, and resist any attempt of a fleet to enter, with as much heroism and energy as the best tried veterans in the world

It is contemplated soon, by many of our citizens to organize themselves into a number of Independent military companies, and form into battalions and regiments. We cannot but admire this public spirit, more particularly so now as a speck of war seems to loom up in the Eastern horizon, and we do not know how soon we may be called upon to defend the State from foreign aggression. The last advices received from the Atlantic States, seemed to infer that trouble was brewing between the United States and England, in relation to the interpritation of the Clayton and Bulwer treaty, Way may come upon the nation, though we do not anticipate it.

In our next issue we shall present our readers with a commencement of a series of articles from the pen of a well known engineer, on artillery practice and military engineering.

We learn that the California Guard, Capt. Johns are making great preparations to celebrate their approaching anniversary in a soldierly and becoming manner. A target excursion and feasting will be the order of the day, and a good time generally indulged in.

THE UNITED STATES ARMY. Form the official Army Register for 1856, we are enabled to gather the following statistical information in regard to the number of officers and the aggregate rank and file, of the U. S. Army, and the regiments at present organized for active ser-

The number of militia force of the United States according to the latest returns received at the office of the Adjutant General, is stated at 2,421,163. The State of New York is set down for 295,563, California comes next as furnishing the most men Her number being stated at 209,645.

NAVAL.-The U.S. frigate Independence, bearing the broad pennant of Commodore Mervin, the commander in chief of the Pacific squadron, is expected to arrive here sometime during the next fortnight. The Independence is a sixty-gun frigate -her armanent consisting mostly of thirty-two and sixty-eight shell guns-manned by a crew all told of near 600 men.

The steamer Massachusetts, Capt. Swarctwout, will probably arrive here next week from Oregon and the Northern Coast. Her armanent consists of ten thinty-two paxams, with a crew of about one hundred and twenty men.

The sloop-of-war John Adams, 22 guns, is an an-

chor in the bay. The Decatur, 16 guns, and the Warren, 16, are lying off the Navy Yard, Mare Island. The complement of the former vessel is about 220 men, and the latter about 130 men each.

Other vessels of the squadron are expected to concentrate here during the ensuing month.
Lieut. Thomas G. Corbin has been detached from the Navy Yard at Mare Island, and ordered to the sloop-of-war John Adams, as the Executive Officer.

ELECTRO CHEMICAL BATHS.

The recent discovery of a really wonderful and most beneficent method of applying electricity for the removal from the human system. of Mercury in all its forms, iron, sinc, lead, antimony, arsenic, quinine, and all other metals, minerals and insidious drug: and the consequent sneedy cure of Paralysis, Rheumatism, Stiff Joints, Painter's Colic and Lame Wrist, Indolent Ulcers, Jaundice, Pever and Ague, Discased Liver, and all Nervous Affections, Is termed as above. The cure is almost immediate. These Baths produce the most gratifying and delightful sensations without shock or disagreeable disturbance of the system. Those who have been without hope for months or years—those who are "neither dead nor alive"—those who feel cold and torpid—those who know they are 'full of mercury,' iron, and wish to have it "t:ken out" of them—all, a!—will take those Electro-Chemical Baths. The Ladies will find them of inestimable value, as in removing diseased conditions, they render the skin clear, soft and smoother. A competent lady will attend to them.

DR BURNE, Water Cure Physician. corner Sansome and Commercial streets, opposite St. Nickolas Hotel, has just imported and arranged the FIRST and ONLY apparatus for administering these delightful Baths, and is now prepared to employ them in all cases of Paralysis, Stiff Joints, Rheumatism, Fever and Ague, (only one Bath is said to be requisite,) Jaundice. Neuralgia, etc. etc.

The Best Female Medicine Known. The Best Female McQueine known.

The Yellow Dock and Sarsaparilla is peculiarly adapted for females of delicate health, resulting from the irregularity of menstrual discharges, and other diseases peculiar to their sex We assure the afflicted that a bottle or two of DR GUYS)TF'S EXTRACT OF YELLOW DOCK AND SARSAPARILLA will at once regulate those difficulties and renew the natural energies.

Syphilis, Scrafu'a and Diseased Blood. Dr. Guysott's Improved Extract of Yellow Dock and rsaparilla is a true specific The proprietors have in their possession over one hundred certificates of the most extraordinary cures effected by it. We can safely say, TRY IT. It revives the drooping constitution, eradicate all bad humors from the blood, and by its tonic properties restores the invalid to health and vigor. As a spring ties restores the invalid to health and vigor. As a spring and summer medicine, it has no equal. Its singularly efficacious action on the blood, its strengthening and vivifying action on the system, stand pre-eminent above all other Sarsaparillas. If you would have the rose brought back to your cheek, a clear, healthy and transparent skin, and life and health isfused through the system, take Guysott's Extract of Yellow Dock and Sarsaparilla. It contains more of the pure Honduras Sarsaparilla than any other preparation extant, which is chemically combined with the Extract of Yellow Dock and the Extract of Wild Cherry, thus making the remedy more efficient than any other Sarsaparilla before the public. At the ame time it is perfectly free from all mineral poisons, which cannot be said of any other Sarsaparilla compounds.

And Corpse Preservers, And Corpse Pres:rvers,

We have received the right of sale of Fisk's Patent Metallic Burial Cases, and are prepared to furnish them to Und.rtakers and others at a small advance upon cost price in the Atlantic States. The advantages claimed by the use of Fisk's Patent Metallic Coffins for preserving the dead, over all others now in use, are: First, that they necessarily cost very little over the price charged for coffins made of the ordinary woods, and that the manner of using them is so simple that any person can do so by following them is so simple that any person can do so by following them is so simple that any person can do so by following the directions which accompany each Case; And, lastly, because they answer the purposes they were originally intended or designed for, vis: the preservation of the human body frem decomposition after death, so that it can be forwarded to any part of the world with safety, allowing sufficient time to gratify surviving friends who may be absent, and thereby enabling them to take the last fond look of the dead, without offending the most delicate or sensitive. We have witnessed the preservative properties of these Coffins a number of times, in cases where it became necessary to convey the corpse to a distance, and never, in a single instance hax we known them to fail is, all that has been claimed for them. Being perfectly air-tight, the body once placed in them retains its matural appearance, without disturbing or disfiguring it in the least: sind will remain so for a number of years, if proper care is taken so as to prevent the case from getting broke. And we further state that it is only necessary to give them a trial in order to satisfy the most skeptical.

Undertakers and General 'urnishers, jupical's milder and General 'urnisher We have received the right of sale of Fisk's Patent Me

TO ANY ONE WHO CAN PRODUCE AS good an AMBROTYPE PICTURE as we are making no matter in what part of the world it was made. R. H. VANCE,

PATENT AMBROTYPES r of Sacramento and Montgomery streets

The those who wish semething New and BEAUTIVE. —We have purchased the Patent Right of CUTTING AMBROTY PES for this State, and are now prepared to take them in a style unequalled in the United States, of any size, from the smallest minature to lite size. Thereby denounce all Pictures taken on Glass in this city or State, and called Ambrotypes, as neous, and a fraud upon the public, being a miserable imitation of the genuine article. I would say to all who have been deceived and swindled with Bogus Pictures, not to condemn this new and beautiful invention until they have seen the GENIURE AMBROTYPES. They are said to be the most durable Picture known, as neither acida, water, or dampness of any kind, can affect them. Those having Daguerreotypes which they wish to preserve FOREVER, would downlite have them repied in Ambrotype.

Great attention will be paid to GHOUPING. Groups from 2 to 30 can be made perfect. Persons can now be taken with Regalias, Military or Fireman dress, without naving the insigning or letters reversed.

We atill continue to execute our splendid Premium Da-

CAUTION TO THE PUBLIC. A CHALLENGE!

THEREAS, A CERTAIN DAGUERREOTYPTET of this city has advertised that he takes the only genuine Assessorves in this city, and that all others are nodus; we announce this a gross misrepresentation, and an attempt to swindle the public. Mr GEO. Mc-KOWN, of our firm, was putting up Ambrotypes by this alleged patentid process, at Mr Root's establishment in Philadelphia, long before a glass picture was taken in California; but, as it was soon found out it invariably destroyed the picture, it was repudiated. We can show any person, in a few minutes, by calling at our rooms, the truth of this statement.

\$200 CHALLENGE! To be left to scientific men, that our pictures are put up better, look better, and will last longer. We are not compelled to buy expensive and magnificent frames to show off our minatures—they speak for them-selves. AND, MIND YOU, we only charge a little more than AND, MIND YOU, we only charge a little more than AND, MIND YOU, we only charge a little more than ONE-HALF the price, The dear public have got to pay for these magnificent frames, and one expenses are trifling, comparatively speaking.
